

AirBoy®- micro

Now you no longer have to choose between quilts or cushions: you can have both on the same machine!

Totally secure and perfectly protected.

Void fill and air cushion quilts; Floeter's new concept in combined protection!

Smaller and lighter than a franking machine, the AirBoy®- micro system is easily positioned in any packing area or payment point.

- ⇒ Only 4.8 kilos, so ultra-lightweight, extremely mobile and compact
- ⇒ Uses only 20 micron film, so totally cost conscious and environmentally responsible
- ⇒ Produces both perforated cushion rolls and quilts
- ⇒ 7 different types of film can be used on just the one machine
- ⇒ 3 configurations of continuous air cushions on 700 linear metre rolls
- ⇒ 4 configurations of continuous quilts on 450 linear metre rolls
- ⇒ Perforated for easy separation
- ⇒ Speed of 6 metres / minute – faster than you can pack!
- ⇒ Film is 100% recyclable
- ⇒ Automatic quantity recognition via sensor-driven device (optional)

The pure simplicity of the system and its high quality construction will satisfy the most demanding users.

The AirBoy®- micro system is available as a starter kit, comprising of the following:

1 AirBoy®- micro®, CE approved , 230V, 120W

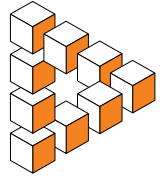

4 rolls of 20 micron film for air cushions 150 x 200 mm, each 700 linear metres

2 rolls of 20 micron film for air cushion quilts, 450 linear metres

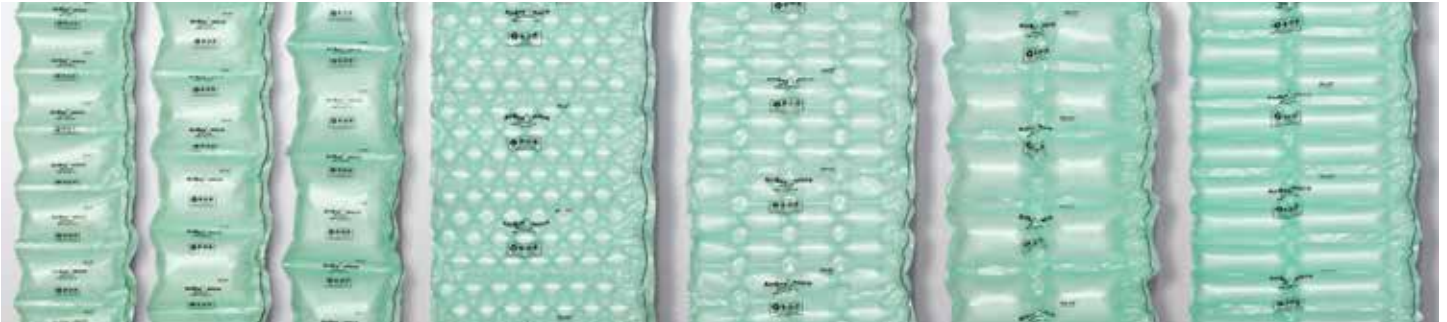

All inclusive price of 1,249 Euro

Please ask our consultants for special terms on larger quantities.

The prices quoted are exclusive of VAT and of a 25 Euro transport charge.

The AirBoy® product range future-proofed for your benefit!

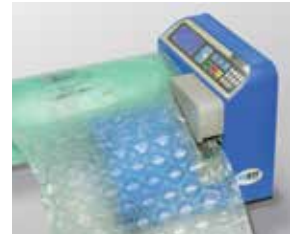

The spacious display gives all important information needed: number and size of air cushions programmed and produced, and the temperature reading. The operation of the machine is comprehensively displayed by means of just a few simple pushbuttons.

Film grade	type 5 HDPE & PA/PE	type 6 & 7 & 8 HD/LDPE	type 7 & 8 HD/LDPE
Application	void fill	void fill	void fill & complete wrapper

The AirBoy® product range:

Floeter supply all grades of suitable film, quickly, directly and competitively.

Floeter Verpackungs-Service: your specialist supplier of air cushioning systems with a unique range of machines, films and auxiliary systems for your packing station.

Floeter has been Germany's leading supplier of air cushioning systems for over 20 years. We can respond to your every need: APM Systems for air cushion quilts and mats, AirBoy® systems for perforated air cushion lengths and now a unique combination of both systems.

Floeter also has over 35 years' experience in film manufacture and supply. We cover the full range, from high grade technical films to economy films at only 20 micron. We offer innovation in manufacturing, quality assurance through our own test laboratory and excellent after sales service; the perfect package!
